GENERAL TABLE OF SUBJECTS

OF THE

REPORT OF THE CENSUS OF THE PROVINCE OF MANITOBA, 1886.

REPORT OF THE CENSUS OF MANITOBA, TAKEN IN 1886.

To His Excellency the Most Honorable Sir HENRY CHARLES KEITH PETTY-FITZMAURICE, Marquis of Lansdowne, in the County of Somerset, Earl of Wycombe, of Chipping Wycombe, in the County of Bucks, Viscount of Caln and Calnstone, in the County of Wilts, and Lord Wycombe, Baron of Chipping Wycombe, in the County of Bucks, in the Peerage of Great Britain; Earl of Kerry and Earl of Shelburne; Viscount Clanmaurice and Fitzmaurice, Baron of Kerry, Lixnaw and Dunkerron, in the Peerage of Ireland; Knight Grand Cross of Our Most Distinguished Order of Saint Michael and Saint George; Governor General of Canada, and Vice Admiral of the same, &c., &c., &c.

MAY IT PLEASE YOUR EXCELLENCY,—

I have the honour to submit the Report of the Census of Manitoba, taken on the 31st July, 1886.

The whole respectfully submitted.

JOHN CARLING,
Minister of Agriculture.

Department of Agriculture,
OTTAWA, August, 1887.

CANADIAN STATISTICS.

MANITOBA CENSUS, 1886.

To the Honorable JOHN CARLING,
Minister of Agriculture.

SIR,—I have the honour to lay before you the Report of the Manitoba Census, for the year 1886.

A detailed statement, concerning the organization and labour of this Census, will be found in the Introduction to the Report.

I have the honour to be, Sir,
Your obedient servant,
E. H. ST. DENIS.
Acting Statistical Officer.

Department of Agriculture,
OTTAWA, August, 1887.

MANITOBA CENSUS, 1886.

INTRODUCTION.

This Census was taken under authority of the Act 48 Victoria, Cap. III, assented to on the 1st May, 1885.

The information which relates to population is a statement of facts in existence at the time appointed for the taking of the census, on the 31st July, 1886; all other information relating to products refers to the period of twelve-months immediately preceding that date.

This report is accompanied by tables giving ratios, between districts, of population and products; also by a comparative statement of the two Censuses of 1881 and 1886, showing the progress made by the Province during these five years.

Since the Census of 1881 was taken, the Province of Manitoba has been reduced in area by about one-half, through the annexing to Ontario and Keewatin of that portion of territory lying east of Lake of the Woods, and which was then called the "Manitoba Extension."

For the purpose of establishing comparisons between the two Censuses, the figures referring to the above annexed territory were deducted from the general result of the Census of 1881.

As in previous Censuses, the *population de droit* or *de jure* system was adopted for the enumeration of the people.

Recourse was had to the returns in the Indian Office, in order to obtain information respecting the Indian population receiving pay under the treaties; and figures were taken from the registers kept. This course was necessary owing to the nomadic habits of the Indians, and to the fact that few of the enumerators were able to speak their language. Those Indians, however, which did not receive pay under the treaties were enumerated in the same manner as the whites.

It should be explained that the registers in the Indian Office do not contain all the details which are called for by the Census schedules,

and this explains why the information concerning the ages, the conjugal condition and the religions of the Indians has been left out of the present report.

Other information, such as that relating to furs, fisheries, &c., is furnished by the returns of the Indian Office, but in a different form from the Census schedules: the value instead of the quantity being given in each case.

The topography of the several Reserves situated in the Province was carefully established, and the population as well as the quantity of products returned by the Indian Office, were added to the returns made by Census enumerators, each Reserve within its respective municipality or sub-district.

The Province was divided into five districts, for Census purposes, corresponding exactly with the five Electoral Districts of Selkirk, Marquette, Provencher, Lisgar and Winnipeg. These five districts were in turn divided into one hundred and six sub-districts, in accordance with the Manitoba Statutes (47 Victoria, Cap. XI).

The organization and superintendence of the Census was confided to Mr. E. H. St. Denis, Acting Statistical Officer, who went to Winnipeg in order to instruct and initiate the several Census officers in their respective duties. The Census staff consisted of Mr. Stewart Mulvey, as staff officer for the Province, and the following gentlemen, as commissioners for the five Districts: Messrs. C. Cliff, E. McDonald, J. E. Têtu, John MacBeth, M.P.P., and H. S. Donaldson. In addition, eighty-nine enumerators were appointed for the several sub-districts comprised in the Province.

Every one of these officers, besides having been supplied with a manual containing the Census Act and the necessary instructions for the taking of the Census, as well as with a set of specimen schedules, to be used as a guide in making entries, underwent a course of oral instructions; so that when the time came for the taking of the Census everyone was thoroughly acquainted with the work to be performed; as a result of this the returns were all received in a very satisfactory condition.

The schedules used for the enumeration were five in number.

Schedule 1 contained twenty-two columns of information into which were registered the name, the age, the place of birth, the religion and the origin of every person enumerated; also the residence, the conjugal condition and the occupation of every family, together with the number of children going to school and the number of persons afflicted with infirmities, such as Blind, Deaf and Dumb, Unsound of Mind.

The number of Public Institutions with their inmates and the number of Industrial Establishments were registered in Schedule 2.

Schedule 3 contained twenty-seven columns for the purpose of registering the quantity of land occupied and cultivated, also the quantity of grain and other field products harvested during the year 1885.

In Schedule 4 the live stock and farm products, as well as the quantity of furs and pelts were registered.

In the last Schedule was registered information relating to Shipping, Fisheries and Products of the Forest.

These five Schedules, enclosed in a portfolio, were filled up by the enumerators going from house to house, each within his enumeration division.

REMARKS ON THE SEVERAL TABLES CONTAINED IN THIS REPORT.

Table I shows with the area for each district, the number of dwellings, the number of families, the population by sexes and the conjugal condition of the people, for each sub-district. In the columns headed "Married," "Widowed" and "Children and Unmarried," the Treaty Indians, for reasons already given, were not counted.

Table II comprises the religions, and the figures given in the last column, headed "not given," refer mostly to Treaty Indians.

Table III gives the origins of the people, and needs no further explanation than the pointing out of the fact that in previous Censuses no special notice was taken regarding the origin of Half-Breeds; the French Half-Breed, the Scotch Half-Breed, &c., were then returned as "French," "Scotch," &c., and were, as a matter of course, classed with the whites.

Table IV needs no explanation.

Table V gives the ages of the people as they were recorded by the enumerators; the column headed "Under one year," being a greater or lesser fraction of one year, and the columns headed 1 to 2, 2 to 3, &c., represent the number of persons living in the Province on the day appointed for the taking of the Census, at one year of age last birthday, two years of age last birthday, &c., the column headed "Not given," in this table, is also composed of all the Treaty Indians, besides a number of whites, whose ages could not be obtained by the enumerators.

Tables VI, VII, VIII, IX and X require no special explanation, except a word respecting table VIII, in which, it will be observed, the number of persons afflicted with blindness is rather small compared to that reported by the Census of 1881; this is accounted for by the fact that the infirmities of Indians were given in that Report while they are left out of the present one.

Table XI gives the occupations of the people, arranged by classes. It will be noticed, on comparing the figures of this table with those of the corresponding table for the Census of 1881, that the number of occupations comprised in the category of the "Not classified," was larger in 1881 than it is in 1886, on account of the occupations of Indians not having been reported in the present Census, while they were mostly all recorded as Hunters and Fishermen in the previous one. In the classification of 1881, the farm labourers were also put amongst the "Not classified" while they are in the present report with the "Agricultural class."

Tables XII, XIII, XIV and XV require no special explanation.

Table XVI is a statement of the number of fur-bearing animals caught or killed by hunters or others during the Census year. The quantity of furs and pelts, as given in this table, is not to be taken, however, as the actual number of animals caught or killed in the sub-district into which they were registered, as the greater part of these furs and pelts were returned by hunters and traders, whose hunting and trading operations extended beyond the limits of their sub-districts, and sometimes from one end of the Province to the other.

Particular care was taken in order to avoid double registration of furs and pelts, which might have occurred by getting the same information from two different sources: from the hunter first and then from the trader. As already explained above, the returns of the Indian Office only give the value and not the quantity of furs and pelts, which value, for all the Indian Reserves of the Province, amounts to $28,680, the greater part of which was of course sold to Traders, who made a return of the same to enumerators.

Table XVII deals with Shipping, Fisheries and Products of the Forest, and requires a word of explanation:—The "Census Standard" log represents 100 feet (board measurement). With regard to that part of this table, which relates to Fisheries, the remarks which were made in the preceding table about the collection of furs and pelts, may also be applied to fish, with this difference, however, that the fish caught by Treaty In-

dians was principally all consumed by themselves, and not sold, as in the case of furs and pelts, to traders and others.

The total value of fish caught by Treaty Indians, as reported by the Indian Office, amounts to $24,580.

Table XVIII is a statement of all Industrial Establishments, in operation in the Province, except those small domestic industries such as cloth making, furniture and carriage building and reparing, &c., exercised individualy by farmers or others, for their own use. A certain number of establishments do not employ, during the whole year, the number of hands returned, and, therefore, the amount given for wages is not to be taken here as having been paid for the year, as some of these industries are only in operation for a part of that time.

Tables XIX, XX, XXI and XXII need no other explanation than those already given on the first page of this Introduction.
